CONFEDERATE ARSENALS, LABORATORIES, AND ORDNANCE DEPOTS

Thomas Pub. Book Condition: BRAND NEW. BRAND NEW Hardcover - 3 Volume Set - Extra shipping required for set - 1248pp - Confederate Arsenals, Laboratories, and Ordnance Depots is a ground breaking study of the fifty-six facilities that produced bullets and cartridges used by the Confederate armies. Over 1300 photos and illustrations of C.S. bullets, cartridges, labels, crates, arsenal buildings, maps, bullet moulds, portraits, southern bank notes, machinery, small arms, and artillery projectiles fill the 3 volumes. It had been considered that Confederate Arsenals, Laboratories, and Ordnance Depots would be the continuing Part Five (or Parts Five, Six, and Seven) of Round Ball to Rimfire; however, although it does continue the history of Civil War small arms ammunition, it actually is more what I have titled it, a study of the fifty-six facilities that produced (with three exceptions) bullets and cartridges used by the Confederate armies. A handful of these were former Federal arsenals and had been in existence at the beginning of the war. Some others were built and maintained by the southern states to store and protect materiel in case of slave insurrections. But, the vast majority were constructed and/or outfitted from scratch at convenient places where supplies of raw materials and labor might be gathered together. As the war progressed and northern forces conquered more and more southern territory, a number of the initial Confederate ordnance works were forced to move to safer locations. Interestingly, as the Yankees threatened the Confederate capital in the spring and early summer of 1862, the Superintendent of Laboratories even recommended that the Richmond Arsenal be moved! A Brand New Quality Book from a Full-Time Bookshop in business since 1992!.
