If properly managed, the butter will have been washed as if it were so much gravel or so much shot, and will not have adhered at all, but will lie in the churn, looking exactly like yellow wheat, --a bonny sight, and a profitable one as well. -In warm weather you may lift it out in that state, but in very cold weather it is better to pour on some more water at 62 to 65, and let stand a few moments, then drain and take out on the worker. It will still be in grains, but not too hard to gather into a mass whenever you begin to work it. Use only the very best salt, too much stress can hardly be laid upon that, and also dont over-salt. It..
