Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from *Laboratory Manual in Physical Geography* This Manual, while prepared as a supplement to the text-book - *Elements of Physical Geography* - by the author, may be used with any other text-book or with any lecture course. The manner in which the subject is taught and the experiments performed is governed to some extent by the place it occupies in the school curriculum. If it is in the third or fourth year of High School, after the pupil has had experimental work in Chemistry or Physics, the experiments need not be as elementary as if the pupil is doing his first laboratory work. For this reason more experiments are given than would probably be performed by one class in a years work, and the teacher can select from these the ones best adapted to the grade of pupils. It is supposed that most teachers will have some experiments which they prefer to some in the Manual, and which can be used as substitutes or as supplementary to those given. Further, the teacher is of course at liberty to change the wording of any of the experiments in any way that will adapt it the better to his class. The Manual, like the text-book, is intended only as a base on which the progressive teacher can build, and is intended to be suggestive rather than mandatory. In all the laboratory work the pupil should be put as far as possible in the attitude of an original investigator.
